

SANDEEP BAZAR

Senior Engineering Manager | Cloud Infrastructure, Virtualization & Platform Engineering

+91 9545253067 | sandeepbazar@gmail.com | Pune, Maharashtra, India | [linkedin.com/in/sandeepbazar](https://www.linkedin.com/in/sandeepbazar) | sandeepbazar.github.io/about

PROFESSIONAL SUMMARY

Engineering leader with 14 years of full-time engineering at IBM's India Systems Development Lab, currently managing multiple squads that build hybrid-cloud platform infrastructure on Kubernetes and OpenShift - virtualization, hosted control planes, multicluster management, observability and reliability. Builds teams from the first hire through production customer adoption, stays close to architecture and code, and has spent four years owning round-the-clock escalations for global enterprise deployments. Six granted US patents and an Executive PhD in progress at IIM Udaipur.

CAREER HIGHLIGHTS

- Built the Virtualization and Multicluster squads from the ground up - from first hire and technical direction through production customer deployments.
- Founding member of IBM's Modern Data Protection engineering organization in Pune: 20+ engineers at inception, 100+ today.
- Six granted US patents, two IBM Redbooks, an IEEE paper and an OpenStack Summit talk.

CORE COMPETENCIES

Leadership	Building and scaling teams Hiring, coaching and career development Technical vision and roadmap Distributed, matrixed organizations Engineering excellence
Platforms	Kubernetes, OpenShift, KubeVirt Hosted control planes and multicluster Distributed storage and data protection Observability and reliability On-prem and SaaS delivery
Engineering	Go, Python, C/C++, Java Design and code review CI/CD and release engineering Livesite operations and escalation Identity, authentication and access

PROFESSIONAL EXPERIENCE

Senior Development Manager - IBM Storage Fusion

Sep 2022 - Present

IBM India Systems Development Lab

Pune, India

Progressed from Senior Technical Lead to Senior Development Manager.

- Lead engineering across virtualization, hosted control planes, multicluster management, observability, serviceability and reliability within IBM Storage Fusion.
- Built the Virtualization and Multicluster squads from the ground up - hiring, onboarding, technical direction, delivery planning and first production customer deployments.
- Own engineering priorities, technical roadmaps, architecture alignment and production readiness for enterprise hybrid-cloud infrastructure.
- Manage and coach engineers through goals, performance, career development and technical growth across multiple squads.
- Architected a Kubernetes-native observability framework in Go with Prometheus, Loki and Elasticsearch, and guided the modernization of platform microservices.
- Serve as lab advocate for strategic enterprise customers, turning complex deployment challenges into engineering priorities and product improvements.
- Drive AI-assisted diagnostics and platform-operations initiatives that improve engineering productivity and serviceability.

Technical Lead - Distributed Storage, Data Protection & Support Engineering

Feb 2016 - Aug 2022

IBM India Systems Development Lab

Pune, India

- Founding member of IBM's Modern Data Protection engineering team in Pune, driving hiring, onboarding, lab infrastructure and engineering process; the team grew from 20+ to over 100 engineers.
- Led the team delivering IBM Storage Scale Object on OpenStack Swift across RHEL and Ubuntu, owning architecture, code review and automated build and release on Jenkins.
- Spent four years as the Asia-Pacific L2 escalation engineer for IBM Spectrum Scale under a 24/7 follow-the-sun model, resolving CritSits with global enterprise customers.
- Built reusable diagnostic tooling and problem-determination practices that reduced time-to-isolate on complex distributed-storage failures.
- Co-authored IBM Redbooks on Spectrum Scale security and unified file and object storage; mentored engineers into test, build and leadership roles.

Software Engineer - Storage, Security & Cloud Platforms

Oct 2012 - Jan 2016

IBM India Systems Development Lab

Pune, India

- Owned quality engineering and test automation for IBM SONAS and Storwize V7000 Unified, and led authentication and security certification for Spectrum Scale across Active Directory, LDAP, NIS, AD+RFC2307 and OpenStack Keystone.
- Qualified NFS, CIFS/SMB, Object and SNIA CDMI protocol stacks, and ran continuous integration, multi-release code streams and defect-fix propagation.
- Built Java and Python utilities for cloud object storage, mobile access and storage-utilization analysis across DS8000 and SONAS.

Software Engineering Intern - Cloud Storage & Platform Development

Sep 2011 - Sep 2012

IBM India Systems Development Lab

Pune, India

- Built a Dropbox-style cloud storage and synchronization service for IBM SONAS and V7000 Unified using Java, IBM MobileFirst and SNIA CDMI - winner of the IBM Innovation Showcase and the basis for an IEEE publication.
- Developed a keyword-driven log-analysis utility in PHP, JavaScript and MySQL that measurably accelerated customer issue debugging for support engineers.

EDUCATION

Executive PhD, Operations Management (in progress)

Jul 2025 - Jun 2028

Indian Institute of Management (IIM) Udaipur

Research interests: artificial intelligence, technology management and organizational decision-making.

M.Tech, Computer Science & Engineering

2010 - 2012

KIIT University, Bhubaneswar

CGPA 9.39. Awarded the AICTE GATE Scholarship for two years.

B.Tech, Computer Science & Engineering

2006 - 2010

Jawaharlal Nehru Technological University

PATENTS – SIX GRANTED, UNITED STATES

- Dynamic Control of Smart Home Using Wearable Device - US 10072866, US 10250403, US 9473321
- Methods and Systems for Controlling Implantable Medical Devices Using Wearable Technology - US 10226632
- Identifying and Managing Redundant Digital Content Transfers - US 10419557
- Overriding Feature to Unblock Contacts During Energy-Saving Mode of a Portable Device - US 9965024

PUBLICATIONS & TALKS

- IBM Redbook - IBM Spectrum Scale Security (REDP-5426), 2018
- IBM Redbook - A Deployment Guide for IBM Spectrum Scale Unified File and Object Storage (REDP-5113), 2017
- IEEE - Enterprise Compatible Cloud Object Storage and Synchronization Service, 2012
- OpenStack Summit, Tokyo - Mobilize Platform Agnostic Adaptability for Object Store, 2015
- IBM TechDoc - Configuring IBM Spectrum Scale Swift and Keystone with HAProxy, 2018

AWARDS & RECOGNITION

- Winner, IBM Innovation Showcase (2012) - cloud object storage and synchronization prototype built on SNIA CDMI
- IBM Execution Excellence & Eminence (2017) and IBM Collaborative Influence (2017)
- IBM Team Excellence (2018), IBM New IBMer (2013) and multiple Star of the Month awards

TECHNICAL SKILLS

Languages	Go, Python, C/C++, Java, JavaScript, Bash
Cloud native	Kubernetes, OpenShift, KubeVirt, HyperShift hosted control planes, Docker, Open Cluster Management
Data & storage	IBM Storage Scale, SONAS, V7000 Unified, DS8000, OpenStack Swift, NFS, CIFS/SMB, SNIA CDMI
Observability	Prometheus, Loki, Elasticsearch, InfluxDB, livesite operations and diagnostics
Practice	Jenkins, Git, Docker, Build Forge, Robot Framework, PyTest, design and code review, Agile delivery

CERTIFICATIONS

CompTIA Storage+ powered by SNIA | IBM watsonx.ai Technical Essentials | IBM License to Lead - First-Line Manager | IBM Agile Explorer | Kubernetes (Hands-on)

Endurance and ultra runner, including 300+ km single-stage events.
